Amateur Radio General Class Workshop—May 8 & 9, 2010.

You need, of course, a Technician license as a pre-requisite to obtain this license. You may attend the class, however, without having any license.

Here is a weekend workshop to help you upgrade your Technician Class ham radio license to General Class. Earn new privileges that will enable you to explore all the ham bands, try out new modes, and get into worldwide communications. A license examination session on Sunday afternoon concludes the workshop, so can upgrade your license to General Class in only two days. Note that the FCC has dropped the requirement for Morse Code. Pass the written element and you will have your General license!

The workshop is free—even refreshments are provided! (There is, however, an exam fee of \$15.00 to cover administrative costs.) To prepare you must get a copy of the ARRL General Class License Manual (6th edition, \$24.95), which is available via web or mail order from the American Radio Relay League: [www.arrl.org/catalog](http://www.arrl.org/catalog).

(Check the ARRL web site for lots of information about ham radio.) You will receive suggestions for studying after you register. AES in Milwaukee sells the book, also. [www.aesham.com](http://www.aesham.com).

Go to <http://spaceplace.wisc.edu/radio.shtml> for additional information.

Please tell us your age if you are a high school student or younger. Register soon! Email Don Michalski at [w9ixg@arrl.org](mailto:w9ixg@arrl.org) or call 608-274-1886.

73,

Don
